SUBJECT INDEX

Analytic functions
How to recover an L-series from its values at almost all positive integers. Some remarks on a formula of Ramanujan 121
Arveson
A quantum spin system with random interactions I 347
Asymptotic behaviour
Oscillations of first order difference equations 147

Bénard convection
Suppression of instability in rotatory hydromagnetic convection 335
Betti numbers
Poincaré polynomial of the moduli spaces of parabolic bundles 233
Biunitarity
Connections for small vertex models 35
Blaschke manifold
An intrinsic approach to Lichnerowicz conjecture 27
Blast wave
An approximate solution for spherical and cylindrical piston problem 103
Boolean rings
RRF rings which are not LRF 133
Bratteli diagrams
The algebra of G-relations 263

C^0 approximation
Construction of 'Wachspress type' rational basis functions over rectangles 69
Caustic
An asymptotic derivation of weakly nonlinear ray theory 431
Cohomology
Poincaré polynomial of the moduli spaces of parabolic bundles 233
Compact rank one symmetric spaces
An intrinsic approach to Lichnerowicz conjecture 27
Compatibility conditions
An approximate solution for spherical and cylindrical piston problem 103
Completely monotone multisequences
Completely monotone multisequences, symmetric probabilities and a normal limit theorem 415
Conservative matrix
On (N, p, q) summability factors of infinite series 61
Continuity
C^2-rational cubic spline involving tension parameters 305
Continuous symmetrization
Continuous rearrangement and symmetry of solutions of elliptic problems 157
Contour integrals
How to recover an L-series from its values at almost all positive integers. Some remarks on a formula of Ramanujan 121
Convexity
C^2-rational cubic spline involving tension parameters 305

Difference equation
Oscillations of first order difference equations 147
Direct heuristic algorithm for linear programming
A direct heuristic algorithm for linear programming 79
Dirichlet-type integral
Continuous rearrangement and symmetry of solutions of elliptic problems 157
Disconjugacy
Oscillations of first order difference equations 147
Dynamic programming principle
Formula for a solution of $u_t + H(u, Du) = g$ 393
Dynamics
A quantum spin system with random interactions I 347

Equivalence relations
The algebra of G-relations 263
Evolution
A quantum spin system with random interactions I 347
Exchangeable probabilities
Coin tossing and Laplace inversion 315
Expected number of cancerous cells
Differential equations related to the Williams–Bjerknes tumour model 323

Galilean transformation
Steady-state response of a micropolar generalized thermoelastic half-space to the moving mechanical/thermal loads 449
Generalized functions
Hyperfinite representation of distributions 363

Generalized functions (distributions)
On the generalized Hankel–Clifford transformation of arbitrary order 293
Generalized Hankel–Clifford transformation
On the generalized Hankel–Clifford transformation of arbitrary order 293
Generalized thermoelasticity
Steady-state response of a micropolar generalized thermoelastic half-space to the moving mechanical/thermal loads 449
G-relations
The algebra of *G*-relations 263

Hamilton–Jacobi equation
Formula for a solution of $u_t + H(u, Du) = g$ 393
Harmonic manifolds
An intrinsic approach to Lichnerowicz conjecture 1
Hydrodynamic instability
Suppression of instability in rotatory hydromagnetic convection 335
Hydromagnetic instability
Suppression of instability in rotatory hydromagnetic convection 335
Hyperbolic equations
An asymptotic derivation of weakly nonlinear ray theory 431
Hyperfinite representations
Hyperfinite representation of distributions 363
Hyperfinite sums
Sampling and Π-sampling expansions 379

Independent
A quantum spin system with random interactions I 347
Inequalities
Inequalities for a polynomial and its derivative 137
Injective hulls
RRF rings which are not LRF 133
Integral inequality
Continuous rearrangement and symmetry of solutions of elliptic problems 157
Integrodifferential equation
Existence of solutions of nonlinear integrodifferential equations of Sobolev type with nonlocal condition in Banach spaces 225
Interior-point methods
A direct heuristic algorithm for linear programming 79
Intermediate Jacobian
Intermediate Jacobians and Hodge structures of moduli spaces 1
Interpolation
C^2-rational cubic spline involving tension parameters 305
Interpolation formulas
How to recover an *L*-series from its values at almost all positive integers. Some remarks on a formula of Ramanujan 121
Isometry
Diameter preserving linear maps and isometries, II 205

Jacobi differential equation
An intrinsic approach to Lichnerowicz conjecture 27

KKM–Fan lemma
On vector equilibrium problem 213
KMS
A quantum spin system with random interactions I 347
Korovkin theorem
Weighted approximation of continuous functions by sequences of linear positive operators 357

Laplace inversion
Coin tossing and Laplace inversion 315
Left norm continuous
Transformation semigroup compactifications and norm continuity of weakly almost periodic functions 55
L-functions
How to recover an *L*-series from its values at almost all positive integers. Some remarks on a formula of Ramanujan 121
Linear preserver problem
Diameter preserving linear maps and isometries, II 205

Mach numbers
Steady-state response of a micropolar generalized thermoelastic half-space to the moving mechanical/thermal loads 449
Mean curvature
An intrinsic approach to Lichnerowicz conjecture 27
Micropolar
Steady-state response of a micropolar generalized thermoelastic half-space to the moving mechanical/thermal loads 449
Mixed Hodge structure
Intermediate Jacobians and Hodge structures of moduli spaces 1
Moduli space
Poincaré polynomial of the moduli spaces of parabolic bundles 233
Moment problem
Coin tossing and Laplace inversion 315
Moment spaces
Completely monotone multisequences, symmetric probabilities and a normal limit theorem 415

Monotonicity
C^2-rational cubic spline involving tension parameters 305

Nice embeddings
An intrinsic approach to Lichnerowicz conjecture 27
Nonlinear wave propagation
An asymptotic derivation of weakly nonlinear ray theory 431
Nonlocal condition
Existence of solutions of nonlinear integrodifferential equations of Sobolev type with nonlocal condition in Banach spaces 225

Non-oscillation
Oscillations of first order difference equations 147
Nonstandard analysis
Hyperfinite representation of distributions 363
Sampling and Π-sampling expansions 379
Normal limit
Completely monotone multisequences, symmetric probabilities and a normal limit theorem 415

Optimality test
A direct heuristic algorithm for linear programming 79
Oscillation
Oscillations of first order difference equations 147
Oscillatory perturbations
Suppression of instability in rotatory hydromagnetic convection 335

Parabolic vector bundles
Poincaré polynomial of the moduli spaces of parabolic bundles 233
Parseval relation
On the generalized Hankel–Clifford transformation of arbitrary order 293
p-Inverse
A direct heuristic algorithm for linear programming 79
P-maximum monotonicity
On vector equilibrium problem 213
P-monotone and *P*-convex mappings
On vector equilibrium problem 213
Polynomial
Inequalities for a polynomial and its derivative 137
Positive linear operators
Weighted approximation of continuous functions by sequences of linear positive operators 357

Quasi-local
A quantum spin system with random interactions I 347

Random
A quantum spin system with random interactions I 347
Rational basis functions
Construction of 'Wachspress type' rational basis functions over rectangles 69
Rational spline
C^2-rational cubic spline involving tension parameters 305
Ray theory
An asymptotic derivation of weakly nonlinear ray theory 431
Residual finiteness
RRF rings which are not LRF 133
Revised simplex algorithm
A direct heuristic algorithm for linear programming 79
Ricci curvature
An intrinsic approach to Lichnerowicz conjecture 27

Sampling expansions
Sampling and Π-sampling expansions 379
Schauder's fixed point theorem
Existence of solutions of nonlinear integrodifferential equations of Sobolev type with nonlocal condition in Banach spaces 225
Schwartz distributions
Hyperfinite representation of distributions 363
Semilinear elliptic problem
Continuous rearrangement and symmetry of solutions of elliptic problems 157
Shock dynamics
An approximate solution for spherical and cylindrical piston problem 103
Simple modules
RRF rings which are not LRF 133
Simplex space
Diameter preserving linear maps and isometries, II 205
Slow rotation
Slow rotation of a sphere with source at its centre in a viscous fluid 117
Sobolev type
Existence of solutions of nonlinear integrodifferential equations of Sobolev type with nonlocal condition in Banach spaces 225
Special values
How to recover an *L*-series from its values at almost all positive integers. Some remarks on a formula of Ramanujan 121

Spin
A quantum spin system with random interactions I 347
Steady-state response
Steady-state response of a micropolar generalized thermoelastic half-space to the moving mechanical/thermal loads 449
Subfactor
Connections for small vertex models 35
Summability factors
On (N, p, q) summability factors of infinite series 61
Symmetry of the solution
Continuous rearrangement and symmetry of solutions of elliptic problems 157
System
A quantum spin system with random interactions I 347
Tension parameter
C^2-rational cubic spline involving tension parameters 305
Transformation semigroup
Transformation semigroup compactifications and norm continuity of weakly almost periodic functions 55

Uniformly continuous semigroup
Existence of solutions of nonlinear integrodifferential equations of Sobolev type with nonlocal condition in Banach spaces 225

Vector bundle
Intermediate Jacobians and Hodge structures of moduli spaces 1
Vector equilibrium problem
On vector equilibrium problem 213
Vertex model
Connections for small vertex models 35
Viscosity sub and super solutions
Formula for a solution of $u_t + H(u, Du) = g$ 393
Viscous fluid
Slow rotation of a sphere with source at its centre in a viscous fluid 117

Weak shock propagation
An approximate solution for spherical and cylindrical piston problem 103
Weakly almost periodic
Transformation semigroup compactifications and norm continuity of weakly almost periodic functions 55
Weight functions
Weighted approximation of continuous functions by sequences of linear positive operators 357
Weighted spaces
Weighted approximation of continuous functions by sequences of linear positive operators 357
Weil conjectures
Poincaré polynomial of the moduli spaces of parabolic bundles 233
Williams–Bjerknes tumour model
Differential equations related to the Williams–Bjerknes tumour model 323
WKS sampling theorem
Sampling and Π-sampling expansions 379

Zeros
Inequalities for a polynomial and its derivative 137

AUTHOR INDEX
